

C-WAGS Trial Secretary Manual

Secretary Operations and Event-Day Reference Guide

Version 1.4 - Secretary Edition

Document status: This manual is limited to trial-secretary workflows. Public entrant instructions, restricted system-management controls, and features still under testing are intentionally excluded.

Contents

This manual is written solely for trial secretaries. It follows the secretary workflow from trial creation and approval through entry management, event-day operations, financial record keeping, reports, and closing.

- 15. Complete Trial Workflow
- 16. Page and Button Reference
- 17. Glossary
- 18. Final Secretary Verification
- 1. About the Application
- 2. Secretary Role and Responsibilities
- 3. Logging In and Navigating

- 8. Running Orders and Score Sheets
- 9. Live Event Operations
- 10. Scoring and Results
- 11. Financial Management
- 12. Trial Journal
- 13. Closing the Trial
- 14. Troubleshooting

1. About the Application

C-WAGS Trial Management is an online web application hosted through Vercel and connected to a Supabase database. Clubs use the same current version through a web browser; no desktop installation is required.

Internet requirement: The production version requires internet access to communicate with Supabase. A browser may continue displaying an already-loaded page during a brief outage, but database changes cannot be considered saved until the connection returns.

The application is designed to support the complete administrative lifecycle of a trial:

- trial planning and setup
- public and secretary-entered registrations
- round-level capacity limits and waitlists
- running orders and score sheets
- live-event management and scoring
- financial tracking
- journal and audit records
- results and post-trial reporting

Application home or login screen

The screenshot shows a web browser window with the title "C-WAGS Trial Management System". The main content area is a light blue gradient. In the center, there is a white login form with a shadow. The form has a title "Login" in bold. Below the title, there are two input fields: "Email Address" (with a sub-label "Email") and "Password". Below the "Password" field is an orange "Sign In" button. Below the button are two links: "Forgot your password?" and "Need an account? Register here".

WHAT TO NOTICE

1. Use <https://cwagstrialmanagement.vercel.app>. 2. Enter the assigned email and password. 3. Use [Forgot your password?](#) when a reset is required.

2. Secretary Role and Responsibilities

Access and available actions depend on the user's role and club permissions.

Role	Typical responsibilities	Examples of access
Trial secretary	Entries, running order, live event, scoring, finances, reports	Assigned trials and operational tools

Rule responsibility: The software supports the host's workflow but does not replace the official C-WAGS rules, trial approval process, premium, insurance requirements, or the judgment of the C-WAGS Advocate and judge.

3. Logging In and Navigating

1. Open <https://cwagstrialmanagement.vercel.app> in a current browser.
2. Enter the email address associated with the club account.
3. Enter the password and select Sign In.
4. Confirm that the correct club and trial are shown before making changes.

Signed-in dashboard

The screenshot displays the C-WAGS Trial Management System dashboard. The user is logged in as Chris Johansen, Trial Secretary. The dashboard includes a sidebar with navigation options like Dashboard, TRIALS, and QUICK STATS. The main content area shows a welcome message, a trial selection dropdown, and several key metrics: 51 Total Entries, 51 Pending Payment, 0 Waitlisted, and 49 Confirmed. Financials are also shown: \$6126.00 Expected Revenue, \$30.00 Outstanding, and \$6221.00 Collected. At the bottom, there's a section for Outstanding Balances with buttons for Export Excel and Volunteers.

WHAT TO NOTICE

1. Confirm the signed-in secretary.
2. Select the intended trial.
3. Review entry and financial totals before opening a workflow.

Best practice: Use individual accounts rather than sharing one password. The journal is most useful when changes can be attributed to the person who made them.

4. Creating a Trial

Create the electronic trial only after the host has decided the dates, location, programs, classes, judges, rings or search areas, fees, and entry limits. These details parallel the information required on the official trial application.

5. From the dashboard, select Create Trial.
6. Enter the trial name and host organization.
7. Enter the trial dates and location.
8. Select the programs being offered: Obedience, Rally, Games, and/or Scent.
9. Add the public premium or premium website information.
10. Save the trial before adding detailed schedules.

The screenshot shows the 'Create New Trial' form in the C-WAGS Trial Management system. The interface includes a sidebar with navigation links like 'Dashboard', 'TRIALS', and 'Spring Champion Hills'. The main form area is titled 'Create the trial' and contains a progress indicator with three steps: 1. Enter the event and location details, 2. Set the date range and default fees, and 3. Review the secretary contact fields. The form fields include: Start Date (08/10/2026), End Date (08/14/2026), Trial Secretary Name (Jamie Secretary), Secretary Email (secretary@example.com), and Secretary Phone ((555) 123-4567). There is a checkbox for 'FEO Available for All Classes'. The 'Default Entry Fees' section shows 'Regular Entry Fee (\$)' set to 23 and 'FEO Price (\$)' set to 15. An 'Additional Notes' field contains the text 'Fictional training trial used for the C-WAGS Trial Secretary Manual.' A 'Location Preview' section shows 'Community Training Hall, Example City, AB, Canada'. A 'Default Fees' summary box at the bottom indicates 'Regular Entry: \$23.00' and 'FEO Entry: \$15.00'.

WHAT TO NOTICE

1. Complete the required trial and location fields. 2. Confirm the auto-filled secretary details. 3. Set the date range, default fees, and FEO availability. Capacity is configured later for classes and rounds.

Trial approval: Do not publish an entry link before the trial is approved and the premium is ready. The Host Guide states that a premium should not be posted until approval is received.

5. Configuring the Trial

5.1 Trial Days

11. Add each date on which classes will be offered.
12. Verify the chronological order.
13. Confirm start times and any day-specific notes.

The screenshot displays the 'Create Trial - Select Days' interface in the C-WAGS Trial Management system. The top navigation bar includes the C-WAGS logo, the title 'C-WAGS Trial Management', the current date and time '8/10/2026, 4:21:33 AM', and the user profile 'JS Jamie Secretary Trial Secretary'. The breadcrumb trail shows 'Dashboard > Trials > Create Trial > Select Days'. The main content area is titled 'Create Trial - Select Days' and features a progress bar with four steps: 'Waiver & Notice' (completed), 'Select Days' (current step), 'Choose Levels', and 'Create Rounds'. Below the progress bar, a yellow box displays the trial title 'Secretary Manual Training Trial', the date range '2026-08-10 to 2026-08-14', the location 'Community Training Hall, Example City, AB, Canada', and 'Selected Days: 2'. The central part of the interface is a calendar for 'August 2026' with a legend indicating 'Selected' (orange), 'Available' (white), and 'Outside Range' (light gray). Days 12 and 13 are selected. To the right, a 'Selected Days (2)' panel lists 'Day 1' (Wednesday, August 12, 2026) and 'Day 2' (Thursday, August 13, 2026), each with a field for optional notes. A 'Total: 2 days selected' summary is at the bottom of this panel. The bottom of the interface includes a 'Previous' button and a 'Save & Continue' button.

WHAT TO NOTICE

1. Select only actual trial dates. 2. Add optional notes for a selected day when useful. 3. Review the selected days before Save & Continue. Day-level capacity is not used.

5.2 Judges

14. Complete Basic Info, Select Days, and Choose Levels before assigning judges.
15. On Create Rounds, select the trial day and class, add the required round, and then select its judge.
16. Confirm each round's judge and capacity. Start Time and Estimated Duration are optional planning aids and may be left blank. When a reset is required, select Add Reset Round and enter the reset judge once on the new half-round card, such as Round 1.5.

Configure rounds and judges

- 1 Choose the day and class.
- 2 Assign the primary judge to each round.
- 3 A reset round is shown as a half-round.

Notes
Optional notes for this round...

Navigation: Back, Save Progress, Save & Continue

WHAT TO NOTICE

1. Select the trial day and class. 2. Configure each round and its judge. 3. Start Time and Estimated Duration are optional and may be blank. 4. Add Reset Round creates a half-round; select its judge once on that new card.

5.3 Classes and Rounds

A class may contain one or more rounds. Capacity and entry status are tracked at the selection or round level, not only at the whole-entry level.

17. Add each class offered.
18. Add the required number of rounds or resets.
19. Set the judge, day, ring/search area, fee, and FEO fee as applicable.
20. Set a capacity limit when the host intends to cap entries.

Class and round configuration

WHAT TO NOTICE

1. Filter by category and select the trial day. 2. Choose the offered levels. 3. Set each level's fee, capacity, FEO availability, and notes. Judges are not assigned on this screen.

5.4 Rings and Search Areas

Use consistent ring or search-area names, especially at multi-ring trials. Names such as “Ring 1,” “Ring 2,” and “Search Area A” should match the premium and trial-day signage.

Multi-ring clarity: Every live-event view, running order, and future competitor display should identify the ring or search area prominently. This reduces confusion when several classes are running simultaneously.

5.5 Fees

Enter the standard fee and, when offered, the FEO fee for each class or round. Waitlisted rounds retain their potential fee but do not count toward the current amount due until promoted.

Choose classes and class fees

- Select the offered levels for each day.
- Confirm the regular and FEO fees.
- Set class capacity where applicable.

----------------	----	-------------	----

☐ Check this box if FEO Available for this class

Notes (Optional)

Special notes for this level...

Capture purpose: Show regular and FEO fees for at least two classes.

5.6 Capacity

Capacity limits apply to individual rounds. A competitor may therefore be accepted in available rounds while being waitlisted in a full round.

Example: A dog entering Patrol 1 Rounds 1, 2, and 3 may be accepted in Round 3 while Rounds 1 and 2 are waitlisted. The accepted round remains valid.

5.7 Trial Application and Approval

After the trial has been configured, generate the Trial Application while the trial is still in Draft. The application can be completed and submitted to C-WAGS before the public trial is published or opened for entries.

- Review the configured days, classes, rounds, judges, fees, capacities, host, dates, and location.
- Open Trial Application and complete any application-only information.
- Download the completed PDF and submit it to C-WAGS for approval.
- Keep the trial in Draft while approval is pending.

25. After C-WAGS approval is received, return to Trial Details, publish the trial, and open entries when the host is ready.

Publishing is a separate step. Generating the application does not publish the trial, and the trial does not need to be published before the application is produced.

Generate and submit the Trial Application while the trial remains in Draft; publish only after approval.

5.8 Trial Collaborators and Staff Roles

Trial Collaborators allow additional registered users to help with one trial without giving them access to every trial in the system. The person who created the trial is its owner; the owner or an application administrator controls collaborator invitations, role changes, and removal.

26. Open Trial Collaborators from the selected trial's sidebar menu.
27. Enter the registered user's email address, choose the least-privileged role that fits the assignment, and send the invitation.
28. Ask the invited person to sign in and accept the invitation before relying on the assignment.
29. Remove or reduce access when the assignment ends.

Secretary: may edit trial setup; manage entries, waitlists, running order, and scores; manage financial records; and generate reports and the Trial Application. A secretary invited to an existing trial cannot manage collaborators or delete the trial. Those actions remain with the trial owner or an administrator.

Assistant: may view the trial and help with entries, waitlists, running order, and score entry. An assistant cannot change trial setup, manage financial records, generate reports or the Trial Application, manage collaborators, or delete the trial.

Use Assistant for event-day help and Secretary only when the person must configure the event or work with financial and official reporting functions. Collaborators never receive access to unrelated trials through this assignment.

5.9 Moving a Postponed Trial Day

Use Edit Days to move an existing trial day to a replacement date. This is not a click-and-drag action. Change the date on the existing day so its classes, rounds, judge assignments, and entries remain attached.

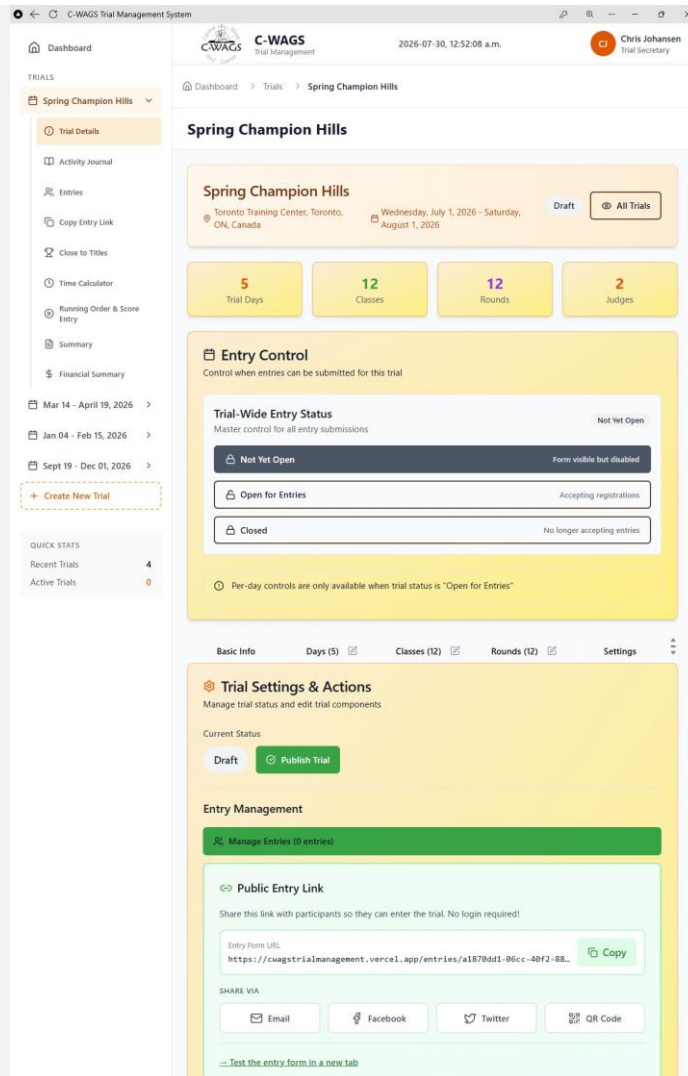

30. Open the trial from the dashboard and select Edit Days.
31. If the replacement date is outside the current trial range, change Start Date or End Date under Edit Trial Date Range, then select Update Date Range.
32. In the Selected Days panel, find the postponed day and select its Trial day date field.
33. Choose the replacement date from the date picker or type the new date.
34. Select Save Changes at the bottom of the page.
35. Return to the trial and verify the new date, classes, rounds, judges, and entry list before reopening entries or continuing event-day work.

Do not remove the old day and create a new one when the day already has setup or entries. Editing the existing Trial day date preserves the day record and its attached information. Each trial day must use a unique date.

6. Publishing and Managing Entries

36. Review the trial dates, classes, fees, judges, capacities, and public instructions.
37. Open or enable public entries.
38. Test the form using a designated test team.
39. Confirm that the entry appears correctly on the secretary Entries page.

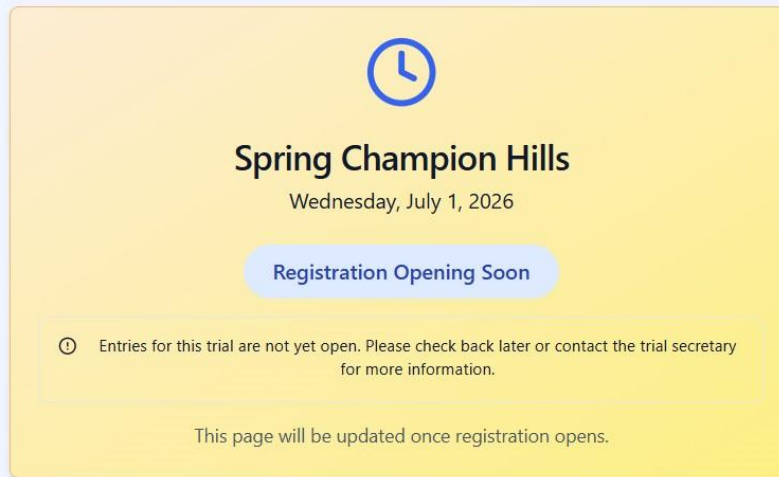

Trial publishing controls

WHAT TO NOTICE

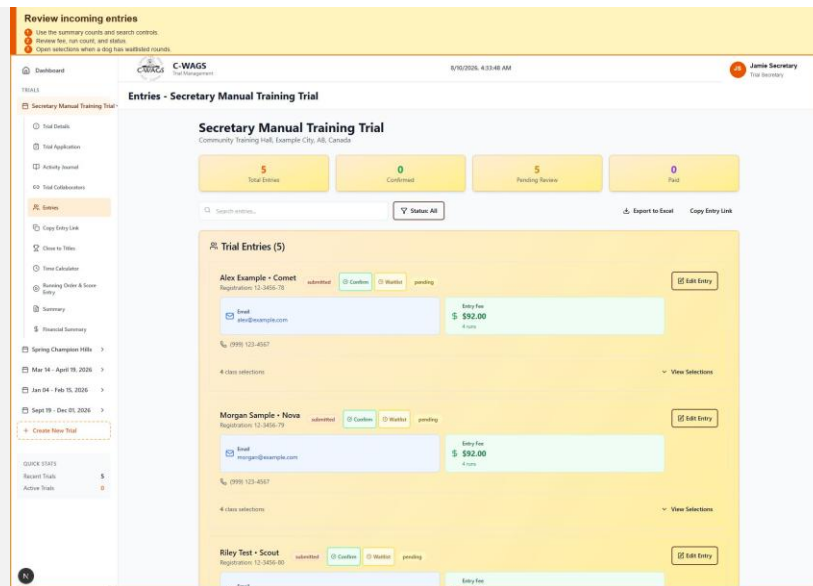

1. Verify the trial summary and Entry Control status. 2. Use Not Yet Open, Open for Entries, or Closed deliberately. 3. Publish only after dates, classes, rounds, judges, fees, and instructions are complete.

Not Yet Open public confirmation

WHAT TO NOTICE

1. Confirm the correct trial name and date. 2. Registration Opening Soon confirms the link works. 3. The message confirms entrants cannot submit yet.

Capture purpose: Show accepted, mixed accepted/waitlisted, fully waitlisted, withdrawn, and paid/unpaid examples.

7. Waitlists and Capacity Changes

8.1 Selection-Level Waitlisting

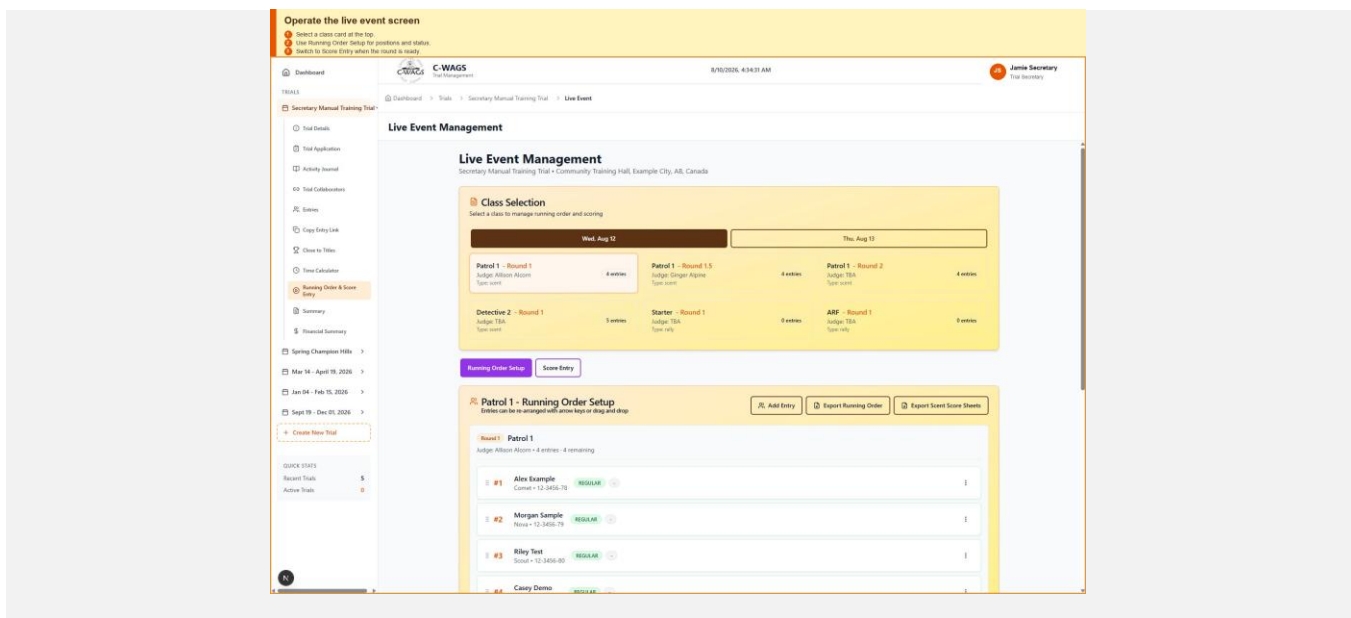

Waitlisting is handled per selected round. Waitlisted selections must not appear in the active running order, score sheets, or digital scoring until promoted.

8.2 Waitlist Order

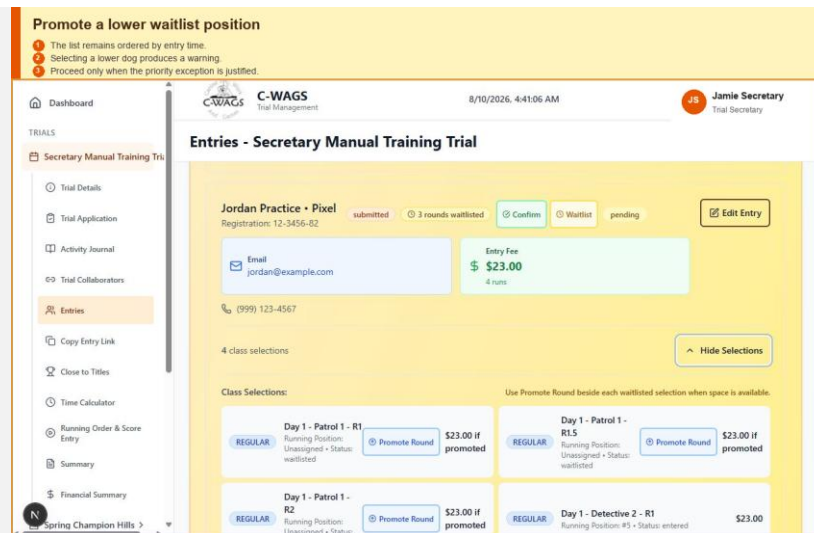

The waitlist should be displayed in the order entries were received. The secretary may promote any dog when there is a legitimate reason, such as a replacement run owed from an earlier issue.

8.3 Promotion

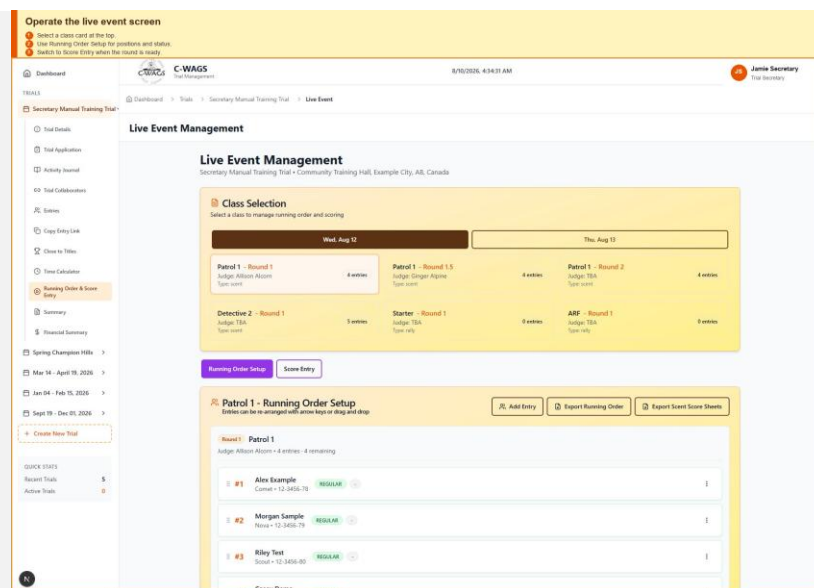

40. Open Live Event and select the class and round.
41. Review the waitlist shown below the active runs.
42. Select Promote beside the desired dog.
43. If the dog is not first in line, review the out-of-order warning.
44. If the round is full, confirm the capacity increase.
45. Verify that the dog moved to the active running order and that its fee became due.

Capture purpose: Show the active runs, chronological waitlist, entry times, capacity, and Promote controls.

Capture purpose: Show the confirmation presented when a lower waitlist position is selected.

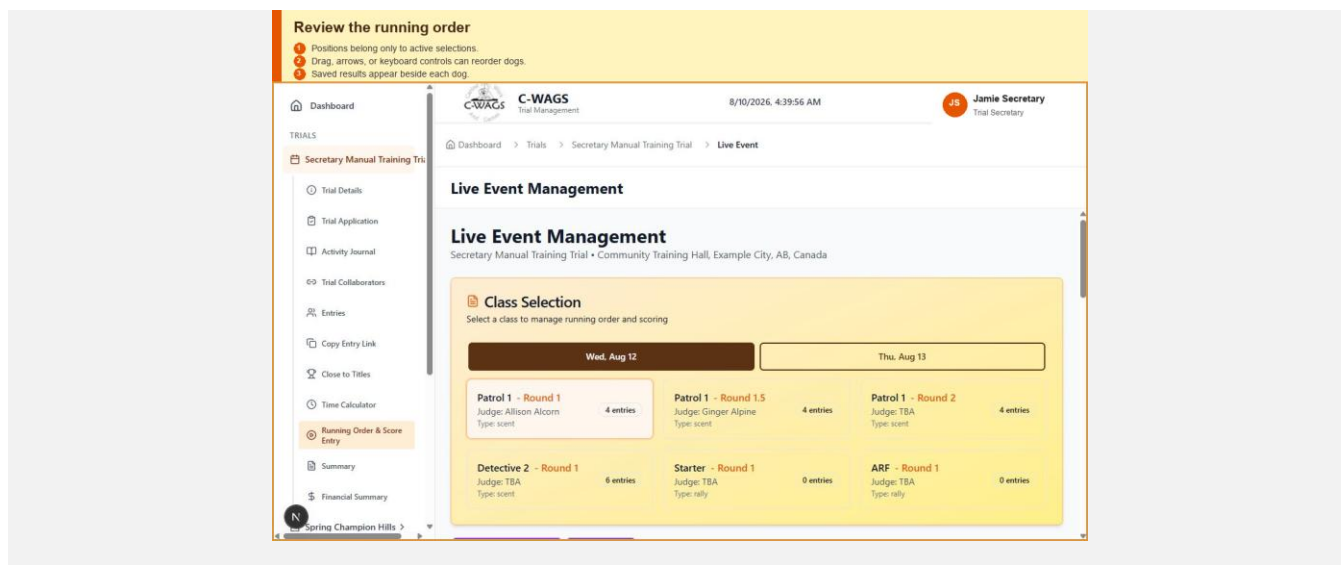

Capture purpose: Show old capacity, new capacity, selected dog, and final confirmation.

8. Running Orders and Score Sheets

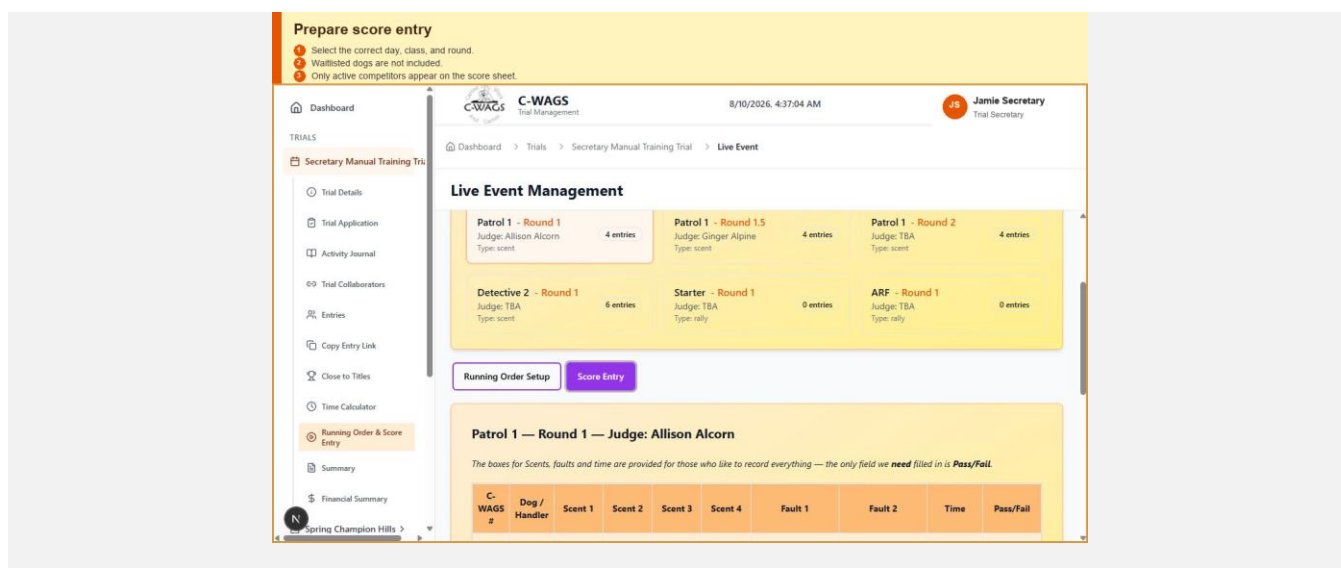

Running orders should contain only active selections. Waitlisted and withdrawn selections are excluded. A waitlisted selection should receive a running position only after promotion.

- Open the required day, ring, class, and round.
- Review scratches, no-shows, and conflicts.
- Reorder active dogs when necessary.
- Generate or export the running order.
- Generate score sheets from the same active list.

Rule alignment: C-WAGS guidance expects dogs to be judged in scheduled order as much as possible, while allowing movement for conflicts. The software should preserve a clear, deliberate record of those changes.

Capture purpose: Show positions, handler, dog, class, round, jump height where applicable, and status.

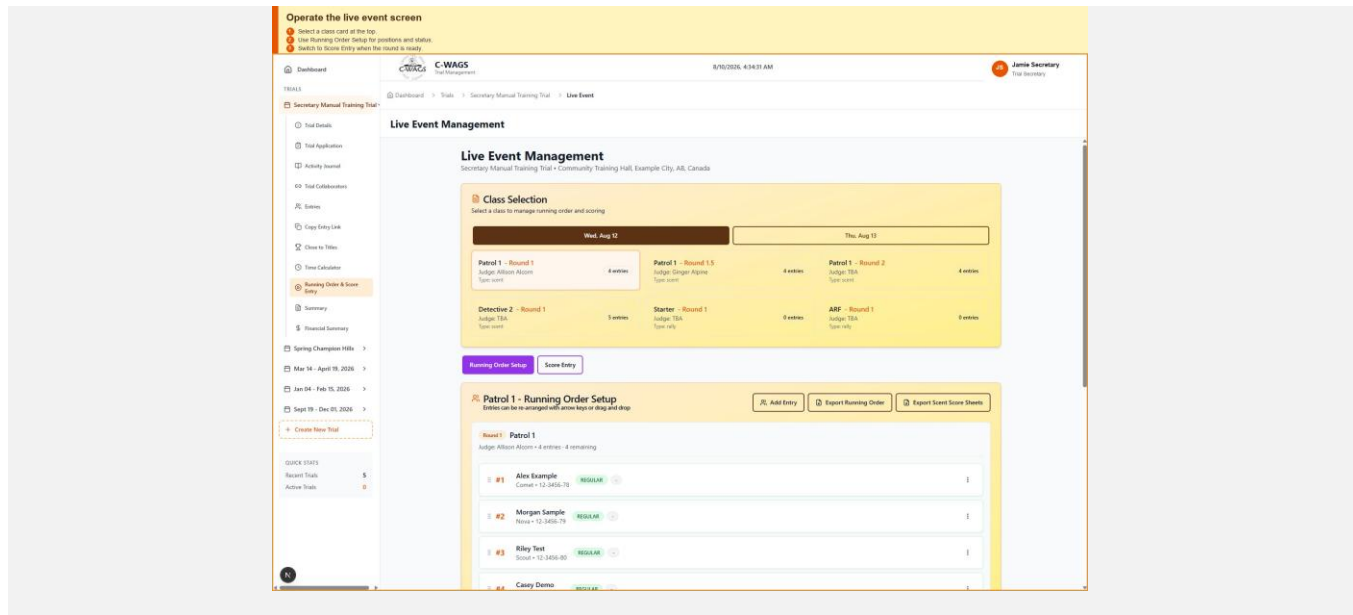

Capture purpose: Show class/round identification and no waitlisted dogs.

9. Live Event Operations

Live Event is the secretary's primary trial-day workspace.

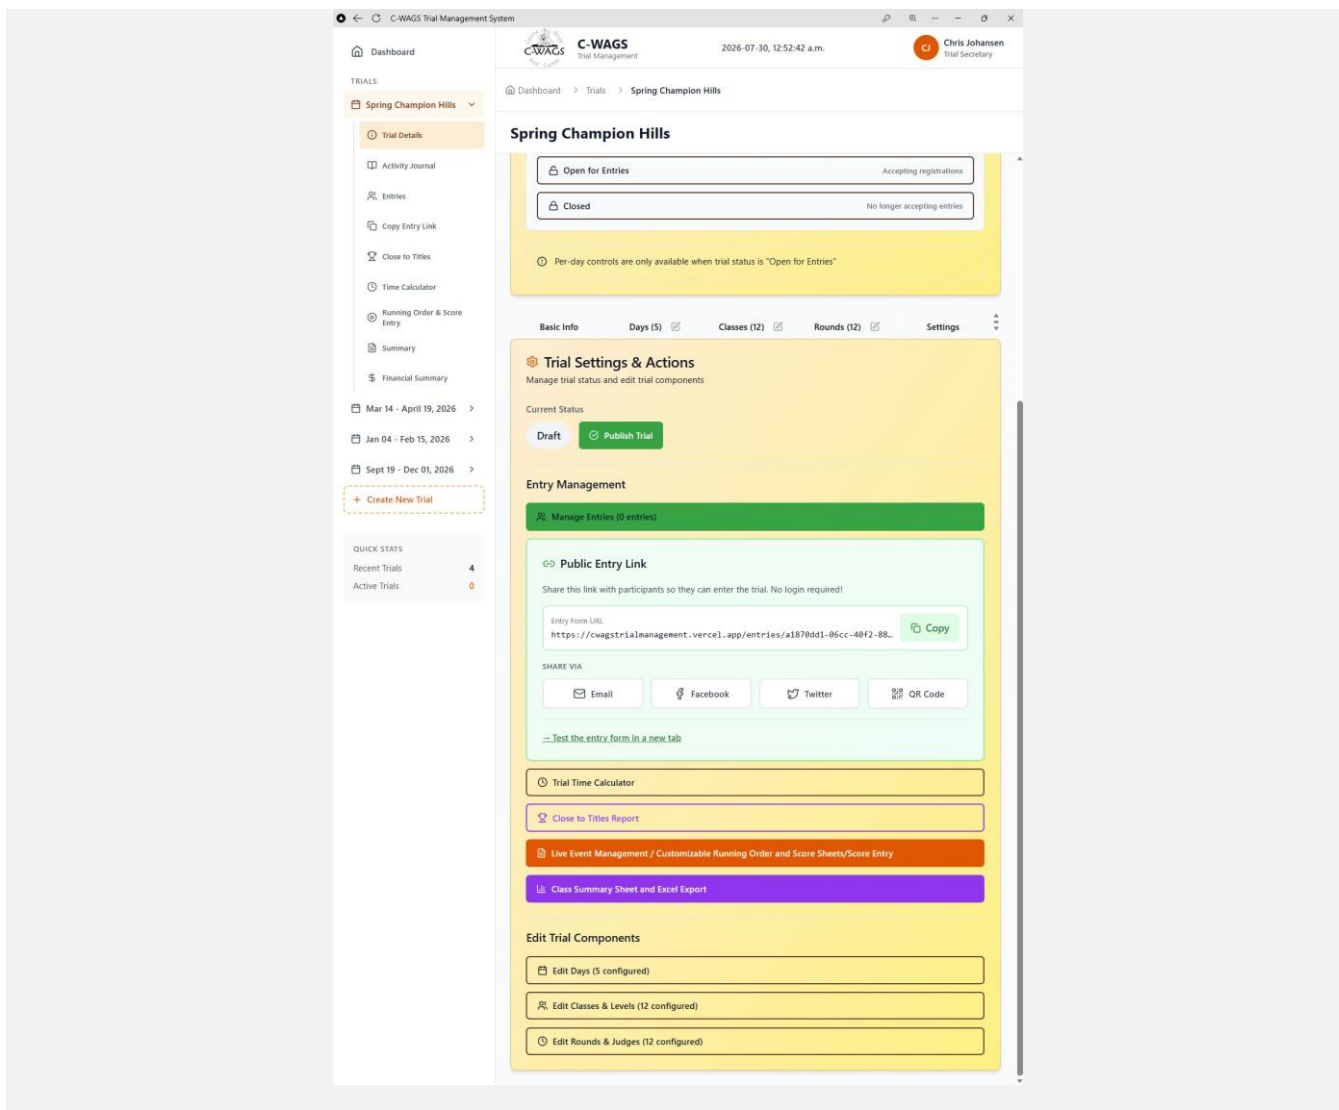

- choose the current day, ring, class, and round

- review active runs and the separate waitlist
- mark scratches, absences, or no-shows
- promote selected waitlisted dogs
- adjust capacity where permitted
- enter or review scores
- monitor remaining dogs

Capture purpose: Capture the full page with ring, class, round, active count, waitlist count, and primary controls.

Quick status actions

WHAT TO NOTICE

1. Confirm the selected trial and current status. 2. Copy or test the public link when needed. 3. Use the colored action buttons to open the appropriate secretary workflow.

Trial-day discipline: Before printing final paperwork, complete check-in and resolve known scratches. This reduces paper waste and helps keep the running order accurate.

10. Scoring and Results

Scoring screens and exports must follow the rules of the selected program and class. Scent classes are pass/fail; Rally and Obedience use scored exercises and qualifying thresholds defined by their rules.

51. Open the correct class and round.
52. Confirm the judge and running team.
53. Enter the score or pass/fail result.
54. Record faults, time, division, FEO status, or notes where applicable.

55. Save and verify the result before advancing.

56. Use the correction workflow when a saved score must be changed.

Record scent results

1 Pass/Fail is the required result field.
2 Scent, faults, and time are optional details.
3 Save all scores and confirm the result display.

Capture purpose: Show pass/fail, faults, time, judge, and notes.

FEO: FEO scores are not recorded as official qualifying results and do not earn placements. The software should clearly mark the run as FEO in scoring and reports.

11. Financial Management

Financial views are record-keeping tools. The application does not process credit cards or transfer funds. Secretary records should distinguish:

- current amount due
- amount paid
- balance owing
- potential waitlist fees
- waived fees
- refunds or credits

Document a fee adjustment

1. Review the original amount and resulting balance.
2. Use waiver controls only with authorization.
3. Confirm the change appears in the journal.

Capture purpose: Show reason and resulting journal entry.

Break-Even setup and the C-WAGS amount

The Break-Even page stores the trial's financial assumptions. The most important value for the C-WAGS amount is the current C-WAGS fee charged for each regular run. Enter the fee published for the event; do not hard-code an old rate or include a fee that applies to a different type of run.

57. Open the trial and select Financial Summary.
58. Select the Break-Even Analysis tab.
59. In C-WAGS Fee (per run), enter the current amount charged for one regular run.
60. Review the other assumptions on the page, then select Save Configuration.
61. Wait for the save confirmation before leaving the page.

The configuration is saved for that trial. When the secretary returns later, the saved fee is loaded again and the Financial Summary calculates the C-WAGS amount from the current regular runs entered in the trial.

How the calculation changes

- Accepted regular runs count toward the C-WAGS amount.
- A waitlisted round has a current fee and C-WAGS amount of \$0 until it is promoted.
- Promoting a waitlisted run makes it active and adds it to the calculation.
- Removing, withdrawing, or scratching a run removes it when that status is not billable.
- A waived regular entry still represents a run owed to C-WAGS; the club absorbs that cost.
- FEO runs are kept separate from this regular-run C-WAGS calculation.

Example: if a trial has 120 active regular runs and the saved C-WAGS fee is \$X per run, the displayed amount owed to C-WAGS is 120 x \$X. Use the current published fee in place of \$X.

Recheck the total after late entries, waitlist promotions, withdrawals, scratches, or fee waivers. The application records financial information but does not collect or transfer payments.

Volunteer and judge reduced entry rates

A judge or volunteer does not receive a reduced entry fee automatically. The secretary applies the host club's approved policy to the appropriate financial row. Configure the rate before recording payment so the displayed balance is the amount the person is expected to pay.

- Full fee: leave the J/V checkbox clear. The normal class entry fees remain in effect.
- Reduced fee: save a Volunteer / Reduced Entry Rate and then select J/V on the approved person's row.
- Full waiver: select Waive and enter a clear reason. A waiver is different from a reduced rate and is retained in the financial and journal records.

How to apply a reduced rate

62. Open Financial Summary and remain on Expenses & Payments.
63. Enter the approved amount in Volunteer / Reduced Entry Rate - Rate per run.
64. Select Save and wait for confirmation.
65. Find the judge or volunteer in the payment table and review the dogs and runs included in that row.
66. Select the J/V checkbox. The program recalculates the affected entry fees and current balance using the saved rate.
67. Verify the new total and balance before recording any offline payment.

Use the reduction only after the person and benefit have been confirmed under the host club's policy. Typical timing is after entries exist and the judge or volunteer assignment is confirmed, but before the payment is recorded. If eligibility changes, clear J/V to restore the normal entry rate. If the saved reduced rate is changed later, clear and reselect J/V for each previously marked row that must be recalculated.

The visible reduced-rate field is the regular-run rate. Review any FEO selections in the same row before applying J/V and do not assume that the regular reduced rate is also the intended FEO rate. A \$0 reduced rate should only be used deliberately; for a true full waiver, use Waive so the reason and waived amount are documented.

Judge compensation entered under Trial Expenses is separate from a judge's reduced entry fee. Adding a judge expense does not mark the judge's own dog entries as reduced, and selecting J/V does not create or pay a judge expense.

Apply an approved reduced rate

- Enter the approved rate per run and select Save.
- Find the eligible person and select the J/V checkbox.
- Verify that the total and current balance recalculate.

Save the approved rate, then select J/V on the eligible competitor row and confirm the recalculated balance.

12. Trial Journal

The Trial Journal provides a chronological record of significant actions. It is especially useful when investigating a later question about entry changes, fees, capacity, or scores.

- entry submitted or modified
- selection waitlisted
- selection promoted
- capacity changed
- fee waived or recalculated
- offline payment status recorded
- dog substituted
- running order changed
- score corrected

Review before-and-after details

- 1 Confirm who made the change.
- 2 Compare the previous and new values.
- 3 Use the record to resolve later questions.

13. Closing the Trial

68. Confirm every class and round has complete results.
69. Resolve missing or duplicate scores.
70. Verify registration numbers.
71. Confirm judge signatures or approvals where required.
72. Reconcile payments and balances.
73. Export final results and required reports.
74. Retain score sheets and records according to C-WAGS requirements.
75. Complete and submit post-trial paperwork within the required timeframe.

Host Guide timing: The Host Guide states that post-trial paperwork must be submitted within 15 days and that original score sheets must be retained by the host for one year.

Capture purpose: Show the final validation or close-trial screen once implemented.

Capture purpose: Show result, recap, financial, and audit exports.

14. Troubleshooting

Issue	Recommended action
The page says the entry is a duplicate	Search the trial by C-WAGS number. Confirm whether an existing entry is being edited rather than

creating a second record.

A valid dog does not appear after lookup

Verify the registration number and registry record. Check that Lookup was selected and that the secretary entry screen received a successful response.

A round should be available but shows full

Review the configured round limit and active selections. Waitlisted and withdrawn selections should not consume capacity.

A waitlisted dog appears on a score sheet

Do not use that paperwork. Regenerate after confirming the selection is still waitlisted. Report the issue for correction.

A promoted dog still owes \$0

Refresh the entry and financial pages. Promotion should activate the stored fee for that selection.

Changes do not appear to save

Check the internet connection and any online/offline indicator. Do not assume a change saved unless the application confirms it.

Reference use: The final manual should summarize rules only where they affect software operation. The official current rule books remain authoritative.

15. Complete Trial Workflow

This section is the operating sequence for a secretary who is creating and running a trial from beginning to end. Use it with the earlier detailed sections and screenshots. Complete the official Trial Application before publishing the public entry form.

15.1 Before Creating the Trial

- Confirm the host club name, venue, city, province or state, full address, date range, secretary contact details, regular and FEO fees, waiver text, and whether FEO is generally available.
- Collect the actual trial dates, programs, classes and levels, number of rounds, reset rounds, judges, capacities, search areas or rings, insurance information, advocate names, and any application exception request.
- Verify that the user creating the trial should be its owner. Invite additional secretaries or assistants only after the draft exists.

15.2 Create the Draft

1. Open Create New Trial. Use the sidebar link or the Dashboard quick action.

2. Complete Basic Trial Information. Enter Trial Name, Host Club Name, Venue Name, City, Country, Province or State, optional full address, Start Date, End Date, secretary details, FEO availability, default regular and FEO fees, and notes. Review the location and fee previews, then select Save and Continue.

3. Review Waiver and Notice Text. Use the host's approved wording. The public entrant must see the correct agreement and event notices.

4. Select Trial Days. Choose each actual event date within the date range. Dates must be unique. Do not add non-event dates simply to fill the range.

5. Choose Classes and Levels. Select the programs and levels offered on each day. Review each regular fee, FEO fee, FEO availability, and capacity.

6. Configure Rounds and Judges. Add the required rounds, assign the correct judge, and identify reset rounds. A reset is represented as a half round such as Round 1.5.

7. Review the Draft. Confirm the summary counts for days, classes, rounds, and judges. Leave entries Not Yet Open while the application is being prepared.

15.3 Complete the Trial Application

1. Open Trial Application. Use the selected trial's sidebar or Generate Trial Application under Trial Details Settings.

2. Review Derived Information. Confirm the host, dates, location, trial contact, programs, schedule rows, and reset rows. Correct trial setup at its source rather than typing over derived data.

3. Complete Application-Only Fields. Enter the premium website, submitted date, trial contact phone, advocate names, inside or outside selection, league status, surface, insurance expiry, exception request, and number of search areas when applicable.

4. Save the Application Draft. This preserves application-only values without changing the trial's Supabase setup.

5. Download Completed PDF. Review the generated application and submit it through the official C-WAGS approval process.

6. Wait for Approval. Keep the trial in Draft or Not Yet Open until approval is received. Generating the application does not publish the trial.

15.4 Publish and Accept Entries

1. Publish the Trial. After approval, use Trial Details Settings to publish or mark the trial active.

2. Set Entry Status. Use Not Yet Open when the form may be visible but disabled, Open for Entries to accept submissions, or Closed to stop new submissions.

3. Review Per-Day Controls. Leave Accept Entries on for available days and turn it off for a filled or closed day. A closed day cannot be selected on the public form even if the trial is open.

4. Copy and Distribute the Entry Link. Use Copy Entry Link only after confirming the correct trial and entry status.

5. Monitor Entries. Use the Entries page to search, filter by status, export Excel, confirm an entry, waitlist an entry, edit entrant information, and inspect round selections.

6. Manage Registration Numbers. An entry can exist before its C-WAGS number is found in the registry. Scores and qualifying results stay with the entry and link to the registry number when that number is later available.

15.5 Prepare the Event

1. Review Capacity and Waitlists. Capacity changes do not promote a dog automatically. Promote deliberately, and document any out-of-order priority decision.

2. Use the Time Calculator. Estimate the schedule with current entries and expected minutes and seconds per run. The first visit initializes average starting times; a club may edit those values when it normally runs faster or slower.

3. Build the Running Order. Choose the day and class. Use drag and drop, arrow controls, or the keyboard. Only active selections receive positions.

4. Export Running Order. Review the class and entries before downloading the workbook.

5. Export Scent Score Sheets. Sheets combine no more than two rounds only when the day, class, and judge match. Round 3 starts another sheet. White rows are the first round and blue rows are the second. The handler and dog block spans both rows, missing rounds stay blank, P and F are separate circle choices, and the heavier horizontal line separates competitors.

15.6 Operate and Score the Trial

1. Select the Day and Class. Open Running Order and Score Entry, choose the event day, and select the correct class card and round.

2. Check In and Update Status. Focus a dog card and use C for check in, N for no-show, S for scratch, or the visible controls. Verify the class summary after changes.

3. Enter Scores. Open Score Entry. For scent, Pass or Fail is required; scents, faults, and time are optional detail fields. Save All Scores before changing classes.

4. Enter Obedience Rally or Games Results. Enter the numeric score and any tie-break order. Placements calculate within the applicable division and exclude TO and FEO entries. Use the rules for the class when resolving ties.

5. Review Class Summary. Compare total entries, present, absent, FEO, missing scores, passes, fails, completion rate, and pass rate. The summary and placements also work for backdated trials when their entries and scores are present.

15.7 Reconcile Finances and Close

1. Configure Break-Even Values. Save the current C-WAGS fee per regular run and other assumptions before relying on calculated totals.

2. Record Expenses and Offline Payments. Use Add Judge or Add Expense, then Save All. Use Pay for an offline payment, J/V only for an approved reduced rate, and Waive only for a documented full waiver.

3. Audit the Activity Journal. Filter and review changes, the responsible user, timestamps, and before-and-after details.

4. Run Final Reports. Review Close to Titles, Class Summary, placements, and the Excel exports. Resolve missing scores and unexplained balances.

5. Close the Trial. Retain the official application, entry export, score sheets, results workbook, financial export, and any required C-WAGS submission records.

16. Page and Button Reference

Locations below are based on the signed-in Trial Secretary interface audited with Secretary Manual Training Trial on September 3, 2026. Controls repeated for each entry or class perform the same action on the selected record.

Page	Button or control	Location	Function
Dashboard	Export Excel	Outstanding Balances	Exports the visible outstanding-balance list.
Dashboard	Volunteers	Outstanding Balances	Opens volunteer or reduced-rate information when available.
Dashboard	Manage Trials	Quick Actions	Opens the trial-management list.
Dashboard	Running Order	Quick Actions	Opens live running-order management for the selected trial.
Dashboard	Close to Titles Report	Quick Actions	Opens the title-proximity report.
Dashboard	Financial Summary	Quick Actions	Opens expenses, payments, and break-even tools.
Dashboard	Activity Journal	Quick Actions	Opens the audit history for the selected trial.
Dashboard	Export Entries Excel	Quick Actions	Downloads the selected trial's entries.
Dashboard or sidebar	Create New Trial	Quick Actions or below Trials	Starts the two-stage create-trial form.
Trial sidebar	Copy Entry Link	Expanded selected trial	Copies the public entry-form URL for that trial.
Trial Details	All Trials	Top of Trial Details	Returns to the trial list.
Trial Details	Not Yet Open	Trial-Wide Entry Status	Keeps the form visible but disables submission.
Trial Details	Open for Entries	Trial-Wide Entry Status	Allows public entry submissions.
Trial Details	Closed	Trial-Wide Entry Status	Stops new submissions.
Trial Details	Accept Entries	Per-Day Entry Control	Opens or closes class selection for one trial day.
Trial Details	Edit	Basic Info tab	Opens editable basic trial information.
Trial Details	Mark Active	Settings tab	Changes the trial's operational status.
Trial Details	Manage Entries	Settings tab	Opens the Entries page.
Trial Details	Copy Email Facebook Twitter QR Code	Settings tab sharing block	Provides the selected sharing method for the public entry link.
Trial Details	Edit Days	Settings tab	Changes actual trial days and allows an existing day to move dates.
Trial Details	Edit Classes and Levels	Settings tab	Changes offered classes, levels, fees, and availability.
Trial Details	Edit Rounds and Judges	Settings tab	Changes rounds, reset rounds, judges, and

Page	Button or control	Location	Function
			capacities.
Trial Application	Back	Top of page	Returns to the selected trial.
Trial Application	Save Application Draft	Generation section	Saves application-only values without changing trial setup.
Trial Application	Download Completed PDF	Generation section	Generates the completed C-WAGS application PDF.
Trial Collaborators	Invite	Invite a secretary	Sends the selected role invitation to a registered user's email.
Entries	Status All	Above entry list	Filters entries by status.
Entries	Export to Excel	Above entry list	Downloads the trial entry list.
Entries	Confirm	Each entry card	Changes the selected entry to confirmed.
Entries	Waitlist	Each entry card	Changes the selected entry or relevant selections to waitlisted.
Entries	Edit Entry	Each entry card	Opens the public entry editor with the C-WAGS number supplied. The number and handler email must be verified before the saved handler and dog information is populated.
Entries	View Selections	Each entry card	Shows class and round selections, types, and statuses.
Live Event	Day tabs	Class Selection	Changes the displayed event day.
Live Event	Running Order Setup	Below class cards	Shows positions, capacity, waitlist, and export controls.
Live Event	Score Entry	Below class cards	Shows the score-entry table for the selected round.
Live Event	Add Entry	Running Order Setup	Adds an eligible entry to the selected round.
Live Event	Export Running Order	Running Order Setup	Downloads the running-order workbook.
Live Event	Export Scent Score Sheets	Running Order Setup	Downloads formatted scent score sheets by day.
Live Event	Increase by 1	Round Capacity	Raises the selected round's capacity by one.
Live Event	Set Capacity	Round Capacity	Saves the entered capacity; it does not promote dogs.
Live Event	Promote Selected Dog	Round Waitlist	Promotes that waitlisted selection if capacity permits.
Live Event	Pass Fail and score controls	Score Entry row	Records the selected dog's result and optional score details.
Live Event	Save All Scores	Bottom of Score Entry	Saves all edited score rows for the selected round.

Page	Button or control	Location	Function
Class Summary	Select All Classes	Class selector	Shows the combined trial summary.
Class Summary	Export to Excel	Top of summary	Downloads the summary and class-detail workbook.
Financial Summary	Expenses and Payments	Top tabs	Shows reduced rate, expenses, and payment rows.
Financial Summary	Break-Even Analysis	Top tabs	Shows saved financial assumptions and projected totals.
Financial Summary	Save	Volunteer or Reduced Entry Rate	Saves the approved reduced fee per run.
Financial Summary	Add Judge	Trial Expenses	Adds a judge compensation row.
Financial Summary	Add Expense	Trial Expenses	Adds a general expense row.
Financial Summary	Save All	Trial Expenses	Saves all expense-row edits.
Financial Summary	Pay	Competitor payment row	Records an offline payment.
Financial Summary	Waive	Competitor payment row	Records a full waiver and its reason.
Activity Journal	Back to Trial	Top of page	Returns to Trial Details.
Close to Titles	Back to Trial	Top of page	Returns to Trial Details.
Create Trial	Save and Continue	Bottom of Basic Information	Validates basic information and advances to waiver and notice text.

17. Glossary

Term	Meaning
ABS	Absent. The dog did not run and is reported separately from a fail.
Active entry	A selection that occupies capacity, can receive a running position, and is eligible for scoring.
Application-only field	Information saved for the Trial Application that does not alter the operational trial record.
Assistant	A limited collaborator who can help with entries, waitlists, running order, and score entry but not trial setup, finances, official reports, collaborators, or deletion.
Read only	A collaborator who can view the trial and generate reports or the Trial Application, but cannot change trial setup, entries, running order, scores, or finances.
C-WAGS number	The dog's C-WAGS registration identifier. A pending entry can later link to the registry when its number becomes available.
Capacity	The maximum active selections allowed in a round. Raising it does not promote waitlisted dogs automatically.
Class card	The selectable day, class, and round item at the top of Live Event Management.
Closed day	A trial day whose Accept Entries switch is off; entrants cannot select its classes.
Completion rate	Completed results divided by entered runs for the displayed class or trial.
Draft	A trial that can be configured and used to generate an application but is not yet publicly accepting entries.
FEO	For Exhibition Only. An FEO run is tracked separately and is excluded from placements.
J/V	Judge or volunteer reduced-rate indicator on a financial row. It uses the saved reduced rate and is not a full waiver.
Pass rate	Passes divided by completed runs, not by all entered runs.
Placement	Rank calculated from eligible scores within the applicable class division after tie-break information is resolved.
Published	A trial available through the public-facing workflow; entry acceptance still depends on trial-wide and per-day controls.
Reset round	An additional half-numbered round, such as 1.5, that represents a reset or distinct course/search setup.
Round selection	One dog's entry in one specific round. Status, fee, waitlist position, running position, and result apply at this level.
Scratch	A selection removed from competing under the applicable trial procedure; it is distinct from absent and fail.
Secretary	A collaborator with broad operational permissions for the assigned trial. Trial ownership and administrator permissions can still limit collaborator management or deletion.
TO	Training Only. TO entries are excluded from placements.
Trial day	A specific date record holding its classes, rounds, judges, entries, and results. Edit the existing day to move a postponed date.

Term	Meaning
Waitlist	Selections held outside active capacity. They have no running position and are promoted deliberately when space is available.
Waive	A documented full fee waiver. This differs from the J/V reduced rate.

18. Final Secretary Verification

- Trial information, actual trial days, classes, rounds, reset rounds, judges, fees, and capacities match the approved application.
- Trial-wide and per-day entry controls match the intended entry window.
- Entries, waitlists, payments, waivers, and registration numbers are reconciled.
- Running orders contain only active selections and score sheets match the correct day, class, round, and judge.
- All required results are saved; missing scores, absences, scratches, tie-breaks, and placements are resolved.
- Class Summary, Close to Titles, financial totals, and exports have been reviewed and retained.
- The Activity Journal contains the expected record of material changes.
